

# Make Your Own Xmas Banner!

## What You Will Need

For this tutorial, you will need a felt, trims (pompoms, ribbon, beads etc), scissors, pins, double sided fusing, paper, sticky tape & a hole punch for the corners.

## Step 1

Write your message in your chosen font. I have used Escafina & Ranger, both from <http://www.losttype.com/> Use sticky tape to secure it onto the felt and cut out.

## Step 2

I have added some decorative details in felt to add to my banners.

## Step 3

Now you have cut out all of your pieces it is time to attach to the banner. Use double sided interfacing to secure the pieces in place ready for sewing.

## Step 4

Once you have done this. Carefully sew the writing and elements to the banner. This is a bit fiddly so take your time.

## Step 5

Now you have finished sewing the elements onto the banner. Attach the back banner and sew inside out. Turn through and press.

## Step 6

You can now decorate your banners with fun trims. I have used pom-poms and beads.

## Step 7

Use a hole punch to add holes in the corners for your rope to hang.

# Merry Christmas
